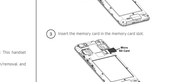
Understand Your Phone

Getting Started

SIM and Memory Card Insertion

Your A107 is a dual SIM device with expandable memory. This handset supports Micro SIM cards only.

Please refer to the following SIM/memory card insertion/removal and handset SIM card slot in the slots correctly.



① Switch off your phone and remove the rear cover.

② Insert the SIM card(s) in the card slot(s).

③ Insert the memory card in the memory card slot.

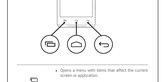
④ Please keep the SIM Card out of the reach of children.

① The card and the contacts are vulnerable to damage due to scratching or bending. Therefore, be careful when inserting or removing the cards.

② Use only compatible memory cards with this device. Incompatible memory cards may damage the card or the device and corrupt the data stored in the card.

Handset Keys

Power Key



- **Turn On** - Press the Power key for 3-4 seconds.
- **Wake up the Screen**- Firmly press the Power key to wake up the screen or to turn off the screen.
- **Turn Off** - Wake up the screen first. Now, long press the Power key to open "Power off" to turn off the phone.
- **Quick Options** - Wake up the screen first. Now, press the Power key for 2 seconds to view quick options.

Volume Keys

Adjust the in-call, media, and ringtone volume from the volume keys available on the right side of the device.

Navigation Keys

- Opens a menu with items that affect the current screen or application.
- While you are on the home screen, tap to view quick access options.
- Long tap to open the most recently used applications.
- Opens the Home screen. If you are viewing any of the extended Home screens, opens the main Default Home screen.
- Long tap to open Google Now.
- Takes you to the previously opened screen until the Home screen appears.
- If the onscreen keyboard is open, closes the keyboard.

Charge the Battery

Before using the device for the first time, we recommend you to use the power adapter to charge the battery for atleast 12 hours.

Connect the power adapter to the power outlet and the USB cable, as illustrated in the following image.

When turned on, the battery level and charging status gets displayed in the upper-right corner of the screen.

Use only Micromax chargers and cables. Other chargers or cables can cause the battery to explode or damage your device. This may invalidate your phone warranty.

Switch Off

To switch off the phone, open the rear cover of the handset and push a pin in the pin hole, as illustrated in the image.

Tap to view all visuals and installed applications. In the application menu, tap and hold any application to take it to the home screen, release the hold to place at any desired location on the home screen.

Home Screen

You can personalize your home screen with shortcuts, widgets, and more. To view quick options, tap Google wallpaper, and widgets, or open settings section, tap the key. You can add extensions to the home screen, remove them, or change the wallpaper. You can also create more screen pagesto. Your A107 will show only those extensions that you have, or have some shortcut/ widget placed on them. Swipe left or right on the home screen to view the extended portion of the screen.

In the bottom pane, there will be five launcher icons for you to open different sections in the phone. Except the application launcher in the middle of the pane, you can rearrange and change the other four icons. Tap and hold any launcher icon, and then you can rearrange, change, or remove them with ease.

Know More About Widgets...

Widgets allow placing application shortcuts on your home screen. You can place analog clock, your recent call logs, and other such sections of your choice on the home page and access them directly. View and delete the widgets by tapping the key from the home screen and then tapping **Widgets**.

Application Launcher

Application launcher or Application menu is available right in the middle of the home screen bottom pane.

Tap to open the application launcher.

Account Configuration

Google Account

Some applications and services of your smartphone may require you to sign in to your Gmail account. If you do not have an existing Gmail account, you can easily sign up and create a new account from the Gmail app in your phone.

Configuring Gmail account will not only allow you to access your emails but it will also enable the Google Now service and sync your data with Gmail account. Changing your handset and setting contact list backup cannot get easier. In addition to this, your Gmail account lets you take full advantage of Google services on your phone. You can also sync your calendar, Google Drive, Google Docs and more. Following is a list of what all you can do and sync your phone data on some applications rendered by Google.

Network connection is required for a successful Gmail account configuration.

Other Accounts

In addition to Google, you can configure other email accounts from:

Go to > **Accounts** > **Add account**

Also, you can download desired email application from the Play Store and access emails from the respective application.

Notifications

Your phone has a notification light on the back panel, which notifies you for missed calls, such as incoming calls, text messages, and charging on/off, as and when they appear in the device. Also, you can now view notifications from the lock screen directly.

Open Notification Panel

Swipe down to open the notification panel.

Close Notification Panel

Swipe up to close the notification panel.

View Application Details

Long tap a notification to view the notification processing application. For example, "Phone" will generate "Missed call" notification.

When you receive a notification, its icon appears in the status bar, along with a brief summary. You may dismiss the notification separately by swiping it towards left or right.

Toolkit provides you shortcuts to manage basic phone features, such as Airplane Mode, Wi-Fi, Display Brightness, and many more.

Clear All Notifications

Tap the Icon to clear all the notifications.

Open Toolkit Panel

Use two fingers to drag down the Notification Panel.

Swap between the Notifications and Toolkit

Swipe left or right to swap between the Notifications and Toolkit.

You can set single and several notifications from Settings.

Gravity Sensor

Your phone has gravity sensor to detect gravity and display correct orientation based on the motion.

You can enable/disable the auto-rotate feature by tapping **Auto-rotate** on the toolkit quick access panel.

OR

You can enable/disable the auto-rotate feature from:

> **Display** > **When device is rotated**

Phone Security

Unlock the Screen

By default, Swipe Unlock is your unlocking technique.

To unlock:

1. Swipe up the Screen by Firmly pressing the Power key.
2. Place your finger on the lock icon and swipe up to unlock the screen.

Protect your phone from unauthorized access. Once locked, the phone can be unlocked by preceding the unlocking password set while choosing the unlocking technique.

Phone Unlocking Methods

To select a phone unlocking technique from:

> **Security** > **Screen lock**

It is important to remember the passwords and commands, which you set for your phone. A forgotten password cannot be retrieved.

Swipe Unlock

Place your finger on the lock icon and swipe up.

Voice Unlock

Set voice commands to unlock the phone. Also, you can set wake up commands to unlock the screen. Analyze/message/call/train-era-diversity.

Pattern

Connect the dots to form a pattern and use the same to unlock.

Password

Set and use an alphanumeric password of atleast 4 characters to unlock the phone.

Set a PIN of atleast four digits as the password to unlock.

Smart Lock

Smart Lock allows you to unlock your device without needing to provide the lock screen password. Your device remains unlocked as long as it is either connected to a trusted device, or when your face is set as the screen unlocking password.

You may set these smart lock methods from:

> **Security** > **Smart Lock**

The Smart Lock option will get unlocked only when you apply a screen lock method other than "Swipe".

You need to sign in to your Google account before using smart lock feature.

Turn on the GPS to unlock using the **Trusted Place** option.

Google Search

Search anything in your phone or on the outside world from Google Search. You can type your search keywords or can even speak up as your search supports voice recognition. Also, you can commands to access various useful sections on your handset.

Google Search is available on the home screen and in the application menu (more).

Using the Touch Screen

Tap and Hold

Tap and hold an item to view the list of actions based on the selected item and conditions. Also, you can move an item from the Apps screen to the home screen using this method.

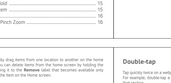
Drag an Item

Tap and hold an item and move your finger on the screen until you reach the target position. The item follows your finger.

You can generally drag items from one location to another on the home screen. Also, you can delete items from the home screen by holding the item and dragging it to the **Remove** label that becomes available only when you hold the item on the home screen.

Swipe

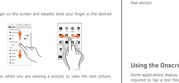
Place a finger on the screen and steadily slide your finger in the desired direction.



For example, when you are viewing a picture, to view the next picture, swipe left.

Using the Pinch Zoom

You can open any image or web page and then use your thumb and index finger to zoom in/out through the pinch gesture.



Double-tap

Tap quickly twice on a webpage, map, or other screen to zoom. For example, double-tap a section of a webpage in the browser to zoom that section.

Using the Onscreen Keyboard

Some applications open the keyboard by default. In others, you will be required to tap a text field, where you want to enter text, to open the keyboard.

When typing, tap key to close the keyboard.

Tap and hold the text field to open a menu and to cut/copy/paste text.

Recent Applications

Tap and hold the key in the far end of the screen to view the list of recently used applications. You can switch to any of these apps from the list or to free some memory and make your phone responsive.

There are two ways to remove items from the list:

Make a Call

Tap the menu icon on the home screen to open the dial pad for making calls.

By default, the dialer will display a list of contacts on which calls have been made very often and the contacts, which have been marked as favorites. You can also search for a contact in the list or contacts by swiping towards left. You can view the dialpad by tapping .

Contacts

Go to >

Store, use, and synchronize contact details in your contact list. You can synchronize the contacts in your phonebook, on web or merge with all right to view the list of contacts and favorite contacts list.

Add a new contact to the contacts list by tapping icon and then entering the contact name, number and details in the respective fields.

Synchronize Your Contact List

You can synchronize your contacts list with any of your accounts configured on this device.

To synchronize your contact list:

1. Tap the icon on the contacts screen and then tap **Accounts**.
2. Select or add the account(s) with which contact list is to be synchronized.

Your contacts synchronization will take few seconds to complete.

Airplane Mode

Some locations may require you to disable all the network-related functions of your mobile. The Airplane Mode allows you to disable all incoming and outgoing calls, Wi-Fi, and Bluetooth connections.

To activate the airplane mode:

Press and hold the Power button and select **Airplane mode**.

Or

Open the toolkit panel and tap **Airplane mode** option.

Send Message

To send a message:

1. Tap on the menu screen or the home screen to go to the messaging section and then tap to compose a message.
2. Tap the icon to view the types of files that can be attached and select the desired type of multimedia file.
3. Tap to select the composition text box and enter your message body in it.
4. Enter the contact name (if it exists) or enter the phone number. You can tap the icon to view and select contacts from the contact list.
5. Tap to send the message.

Camera

Go to >

Gallery

Go to >

You can use the Gallery to view pictures, play videos, and share files. Tap an album to open its contents.

Music Player

Go to >

Press the phone's volume up/down keys on the right side of the phone to adjust the volume.

You can use an SD card to increase the storage capacity for your multimedia files such as music, photos, emails, and so on.

FM Radio

Go to >

You can listen to your favorite FM channels using the inbuilt FM receiver of your A107. Connect a wired headset to the phone, as the wired headset works as antenna for the FM radio. The wired headset provides the radio interface to enjoy the features of your inbuilt FM radio.

Press the phone's volume up/down keys on the right side of the phone to adjust the volume.

Settings, Networks, & Applications

Your phone can connect to networks and devices, including Internet, Wi-Fi, Bluetooth, and USB devices, and mobile networks. You can also transfer files to/from PC through the data cable.

Go to >

Connect to the Internet

To configure Internet, go to > > **Data Usage** and tap the SIM connection on which data connection is to be enabled. Under the selected SIM card, enable the **Cellular Data** option.

You may also need to configure the access point name for the data connection to work.

You can configure the access point name from:

Go to > > **More** > **Cellular networks** > **Access Point Names**

By default, the access point name gets configured once you insert the SIM or your network provider sends the access point name settings to your device. You can check if the settings are correct. If the access point names are not listed by default, please contact your network provider for the same.

Tethering & Portability

You can use your A107 as a modem and connect your PC or laptop to the Internet using your data connection. Start using your SIM data pack on your handset, PC or Laptop instantly.

Go to > > **More** > **Tethering & portable hotspot**.

USB Tethering

Connect your phone with your PC/Laptop via USB cable.

Enable the **USB tethering** option.

Select your phone connection as the network connection in your PC/laptop and get access to the Internet.

Bluetooth Tethering

1. Pair your phone with the Bluetooth enabled PC/laptop and Bluetooth pairing process.
2. Enable the **Bluetooth tethering** option in your phone.
3. On the paired PC/laptop, select the Bluetooth device (your phone) and choose to connect to the Internet.

Wi-Fi Hotspot

1. Turn on the **Wi-Fi hotspot** option in your phone.
2. On the other Wi-Fi enabled PC/laptop/handheld, choose your phone as a Wi-Fi network to connect to the Internet.
3. View and configure Wi-Fi hotspot settings by tapping **Wi-Fi hotspot** option.

Your mobile operator will charge you based on your data usage.

Pair With Bluetooth Devices

Go to > > **Bluetooth**

To pair your A107 with some other Bluetooth device:

1. Turn on the **Bluetooth** and turn it on. Your phone scans and displays the list of Bluetooth devices in range.
2. Tap the device you want to pair with from the list to pair with it.
3. You will be prompted to confirm passkey on both devices. Tap **Pair** to confirm the passkey and pair the devices. On successful pairing, your phone connects to the device.

If the device you want to pair with is not in the list, make it discoverable and then tap the icon on the Bluetooth screen and search **Refresh**.

Google Maps

Google Maps is an app from Google that gives you access to various map-related services. You can view your location on a map, search for different landmarks, find directions to locations, and even view Street View photos from around the world. The built-in navigation works with GPS to find your location and provide directions. Google Maps also lets you download maps to use offline, and share your location with friends. For the best experience with Google Maps, configure the following settings.

Enable location access from > **Location.**

Go to > to start using Google Maps.

Internet connection is required for using Google Maps. When you use the map, you use your Internet connection to transfer data to and from your phone.

The Google Maps application may not be available in every street, country, or area.

Micromax does not guarantee the accuracy of any directional services

Manage Applications

Your phone comes with a host of applications to make your life easier and more convenient. The phone offers you a range of useful and entertainment sources. You can download applications, games, themes, and more from the Google Play Store and install them on your phone. To download applications, you first need a Google account to get started.

To view and manage the list of all inbuilt, downloaded, and running applications, go to > **Apps**.

To download applications, games, movies, and books from the Google Play Store, go to > and search for the Google Play Store. View the details and download items, as desired.

Not all items are free of cost in the Google Play Store.

You need to have an Internet connection and be signed in to your Google Account to use the Google Play Store.

Safety Precautions

Switch off your device in any area with potential explosive atmosphere and obey all signs and instructions. Sparks in such areas may cause fire or explosion. Therefore switch off your device at refueling points (gas stations) and comply with restrictions in fuel depots, chemical plants or areas where blasting operations are in progress. Areas with potentially explosive atmosphere are often but not always clearly identified. They include areas where you would normally be advised to switch off your vehicle engine, areas below deck on boats, chemical transfer or storage facilities and areas where the air contains chemicals or particles, such as grain, dust or metal powders.

Always keep the phone and accessories out of reach of small children. Keep your device and all its parts and accessories out of reach to avoid accidental swallowed by small children.

Do not place the phone near electromagnetic data carriers such as credit/debit cards. Information stored on them could be lost.

Permanent damage to hearing may occur if you use earphones at high volume for prolonged periods. Set your volume to a safe level. If you experience discomfort in your ears, reduce the volume or discontinue the use of your earphones.

Manufacturers of medical devices recommend a minimum separation of 15 cm between a wireless device and a pacemaker. An impaired medical device user should use the device on the opposite side of the body from the pacemaker and not carry the device in a breast pocket.

The mains voltage (V) specified on the power supply unit must not be exceeded and damage to the charging device. The power supply must be plugged into an easily accessible AC power outlet whenever you charge your device.

Do not allow your device to make contact with liquids of any kind. If your device is exposed to liquid, switch it off immediately and take it to an authorized service centre.

Do not store the device in high or cold temperature. Extreme temperatures can damage the device and reduce battery life and battery life.

Do not use or store the device in dusty, dirty areas. Its moving parts and electronic components can get damaged.

Do not attempt to open the device other than as instructed in this guide.

Do not drop, knock, or shake the device. Rough handling can break internal circuit boards and fine mechanics.

Do not paint the device. Paint can clog moving parts and prevent proper operation.

Do not use the device near medical equipment without advice to come in contact with magnetic fields for extended period of time.

Battery Recommendations

- Please put the battery in a cool and well-ventilated place out of direct sunlight. We recommend you to charge the battery at room temperature (25°C).
- Please use only Micromax approved batteries, chargers, accessories and supplies. Micromax will not be held responsible for your user's safety when using unapproved accessories or supplies.
- Do not discard the battery with household trash. Please dispose of used battery according to your local environmental laws and guidelines.

Taking Care of Your Device

Your device is a product of superior design and craftsmanship and should be treated with care. The suggestions below will help you protect your warranty coverage.

- Keep the device dry. Precipitation, humidity, and all types of liquids or moisture can contain minerals that will corrode electronic circuits. If your device does get wet, remove the battery, and take it to an authorized service centre.
- Do not store the device in high or cold temperature. Extreme temperatures can damage the device and reduce battery life and battery life.
- Do not use or store the device in dusty, dirty areas. Its moving parts and electronic components can get damaged.
- Do not attempt to open the device other than as instructed in this guide.
- Do not drop, knock, or shake the device. Rough handling can break internal circuit boards and fine mechanics.
- Do not paint the device. Paint can clog moving parts and prevent proper operation.
- Do not use the device near medical equipment without advice to come in contact with magnetic fields for extended period of time.

Recycle your Phone

The WEEE logo (shown at the left) appears on the product or packaging to inform you that at the end of life that this product must not be disposed off or dumped with your other household wastes. You are liable to dispose off all such electronic equipment at the designated collection facilities appointed by the government or the local authorities in order to minimize the environmental impact and its effect on human health.

Collection and proper recovery of your electronic waste equipments at the time of disposal will help conserve natural resources. Micromax complies with all the electronic waste equipment and ensure safety of human health and environment. For more information on best practices for disposal of electronic waste equipments, please visit its web site www.micromaxinfo.com/ecowise.php
